

US-2000 FSB

US-2000 FSB-A

The US-2000 FSB-A counts, stacks, and bands post cards and other printed materials in one process. The system is available with magazine feed, autoloader, or 90 degree feeder options. A digital display provides a user-friendly interface to ease machine set up and operation.

US-2000 Triple FSB

The US-2000 FSB can also be equipped with multiple feeders. With the Triple-FSB, three different products are counted, stacked, collated and subsequently banded.
