

77205

High Profile Fixed Speed Turntable with Toggle Switch Operated Variable Speed Quick-Load Film Dispenser

OVERVIEW

When it comes to automating a hand wrapping application the field-tested 77205 is hard to match. These stretch wrap machines come equipped with a variable speed film carriage to move the Quick-Load film dispenser up and down. Just load the 48" round or octagon turn table, attach the film, set the film carriage's vertical speed and the dispenser's stretch wrap tension. While the load turns you can vary the speed as you control the up and down movement of the dispenser with a toggle switch. Increase productivity, economize film usage and have tighter load security.
