

StrapPack®

Publication Strapping Machine

■ Speed

At 54 cycles per minute, the RQ-8N12 is among the fastest strapping machines made. It can process 40 bundles of newspapers per minute.

■ Automatic Coil Changeover

When the RQ-8N12 runs out of strap, it automatically switches to a spare coil without interrupting automatic operation.

■ Automatic Tension Adjustment

Strap tension is automatically adjusted based on the size of the bundle.

■ Automatic Strap Ejection

If a strap feeding problem occurs, the problem section of strap is automatically cut and ejected. Feeding resumes with a new section of strap.

■ Touch Panel Operation

The touch panel makes it easy to set compression, gates and guides. Production statistic can also be reviewed.

■ Conveyor Speed Inverter

The speed of the conveyor can be easily adjusted. The inverter provides easy adjustment of conveyor speed, acceleration and deceleration.

RQ-8N

■ Standard Specifications

Dimensions	Width	1694 mm	66-3/4 in.
	Height	1868 mm	66-3/8 in.
	Depth	631.5 mm	24-7/8 in.
	Weight	Approx. 420 kg	924 lbs.
Table Height	820 mm	32-1/4 in.	
Minimum Package Size	W 200 50 H	W 7-3/4 in H 2 in.	
Maximum Package Size	W 500 400 H	W 19-1/2 in H 15-3/4 in.	
Speed	54straps/ min		
Strap Width	Polypropylene		
	5, 6 mm	1/4 in.	
Power Supply	220, 240, 440, 460, 480V Three Phase 50 / 60Hz
