

## US-2000 SCB

The US-2000 Stacking, Collating and Banding systems will accumulate from a single stream infeed. Stack counts are selected by the system operator. Orientations of 2 x 3, 3 x 3, 1 x 6 are common. The band eliminates the need for inner cartons. Product specials and multi-packs are processed at packaging line speed while minimizing labor requirements. Printed banding material can be used for product identification and multi-pack coding.
