

## US-2000 Transit Line

The US-2000 Transit Line bands a great variety of products. The system is placed in-line to provide hands-free processing of product bundles. Using infeed and exit conveyors, products can be rapidly banded. Material positioning plates, pneumatic presses, and corner conveyors for cross-banding are options available to improve versatility. For quick roll changes, the US-2000 Transit comes with pullout dispenser with rapid thread tape system and auto-thread on the tape infeed. A touch screen operator interface provides user friendly machine setup.
