

US-2100 Wide Format Bander

Felins offers the ATS US-2100 wide format bander, which is specially designed for band widths of 75mm and 100mm, respectively.

The Ultra-Sonic cold-weld technology ensures fast, clean and consistent sealing. The welder has no heating element, allowing for immediate use and eliminating film residue buildup.

Branding with Banding - combine marketing graphics and bundling of products in a single step! A wide variety of materials can be custom imprinted with company specific information including bar codes, promotional information and logos. The ATS US-2100 is also available with an in-line thermal printer, capable of imprinting on either paper or plastic banding materials.
