

Conveyor Product Table

Description

Production line bottlenecks a problem? Need additional in-line storage capacity? These high quality accumulation tables are constructed from the same aircraft-grade aluminum and stainless steel used in our popular line of labeling machines. Parts are finished with a durable stainless steel coating.

Standard tables are powered by an independent, variable speed DC motor that drives the conveyor chain slightly faster than our labelers. Each table is controlled by an independent on/off push button.

Features

- Aluminum and stainless steel frame construction for durability and easy maintenance.
- Variable speed DC motor.
- FDA approved Conveyor Belt
- Can be build to size in 12" increments.
- Can be utilized to feed product in addition to accumulating.

Specifications

- 110 Volts, 3 amps
- 24" wide and 36" long – standard size
- Adjustable height from 32" to 34"
