

US-2000 MDM-P

- ✓ Real time printing with preprinted or blank banding material
 - Date/Time Stamps
 - Barcodes/UPC
 - Pricing Information
- ✓ Continuous printing up to 150mm length
- ✓ Printing and Banding processes are completed in parallel
- ✓ Utilizes the proven US-2000 Ultra Sonic Technology
- ✓ Controlled by the state of the art V5 controller
- ✓ Easy height adjustment

Combine the benefits of multi-color pre-printed graphics with the timeliness of on-line printing. With the US-2000 MDM-P, you have the ability to use company logos, and other pre-printed detailed graphics in combination with the in-line printing. Use the built in Markem printer to locate lot/date codes, price, or other dynamic/time sensitive product related information on the pre-printed band.

Elektrischer Anschluss: 230V, 50Hz
 Pneumatischer Anschluss: 6 bar
 Farbe RAL 5012 (ATS-blau)
 ca. 20 Takte/Min.

Easy to use Markem software lets you design an infinite number of print patterns.

The material is printed during the banding process, minimizing cycle time.

In-line printing features (i.e. price) can be consistently located on pre-printed bands by using the print mark registration feature.
